## INSUL-ANCHORS

### SELF-STICK INSUL ANCHORS

#### INSTANT ANCHOR PLACEMENT

**CONTINENTAL** Self-Stick Insul-Anchors simplify the permanent installation of insulation to nonporous construction surfaces and non-weldable materials. They can be applied quickly and easily. Simply peel off the release backing, press in place, and then hang the insulation. There are no messy adhesives, or time-delay for adhesive curing.

**CONTINENTAL** Self-Stick Insul-Anchors are available with a 2" x 2" solid plate and 12 ga. spindle of varying lengths to meet your requirements.

To complete the insulation fastening operation, **CONTINENTAL** Self-Stick Insul-Anchors are used in conjunction with **CONTINENTAL** Self-Locking Washers.

For more information concerning the application of **CONTINENTAL** Self-Stick Insul-Anchors, see the reverse side of this page. For more information concerning self-locking washers refer to the Washers, Caps and Nuts section of this catalog.
