

OFI Basic (Unfaced Metal Building Insulation)

► Specification Data

Description

OFI Basic Unfaced Metal Building Insulation is a thermo-set resin bonded flexible roll insulation. It will not shrink or settle from exposure, vibration, temperature, or humidity. It will not stain, corrode, rot, or sustain vermin or fungi.

Application

OFI Basic offers thermal control in roof and walls of pre-engineered steel buildings.

Surface Burning Characteristics ULC Listed (CAN/ULC-S102) UL Listed

Flame Spread	5
Smoke Developed.....	0

Dimensions

Width	72"	48"	36"
Length	Depends on the thickness		

Specifications Compliance

CGSB	51.11-92 Type 1 Class 2
------------	-------------------------

Limitations

Not to be used on systems working at temperatures higher than 232°C (450°F).

► Performance Data

Thermal Performance

(At 24°C (75°F) mean temperature)

Thicknesses (in inches)	r values
2.0	6.9
2.5	8.7
3.0	10.4
3.5	12.0
4.0	13.8
5.0	17.3
6.0	20.0

Published product property characteristic values are nominal and subject to normal manufacturing tolerances.
